

rTimeTracker

Cloud-based Time Tracking, Billing and Project Management Solution

Manage time spent on projects for Architects - Construction - Consultants - Creatives - Engineers - IT - Other Functions.

Much more than automated timesheets, rTimeTracker helps you manage projects by customer, resource, task and date. It tracks budget and estimates versus actuals. rTimeTracker easily feeds your payroll and invoicing.

Use this Cloud-based application on mobile devices with no startup costs and only a low monthly fee. rTimeTracker can be purchased for time entry only.

Match Business Needs Manage timesheets based on your unique business processes or customize the process workflow.

Integrated Time Tracking Track hours worked and allocate directly to projects or tasks to expedite project management and accounting.

Flexible Time Entry Submit timesheets from anywhere, at any time, using any device including mobile.

Automate Expense Reports From receipt capture to reimbursement, rTimeTracker takes the pain out of the process.

Project Management Create project tasks, sub-tasks, allocate effort and resources, and track the project schedule and cost.

Resource Management Optimize efficiency by effectively handling resource allocation, utilization, availability, assignment and performance reviews.

Business Intelligence Take informed decisions by visualizing your data thorough real-time dashboards.

Project Management

Managing Statements of Work (SOWs), projects, sub-projects and their tasks in rTimeTracker is very simple. rTimeTracker allows you to track time on projects, tasks and control the due date for tasks and projects. It provides some key features that can lessen administrative work considerably to save time and cost and have better control over project and resources.

- Create Project, Sub Project, Task and Task Assignment
- Resource Management
- Leave Management
- Track Cost and Burn Rate
